

BISHOP ABRAHAM GRANT, Of Texas.

Bishop Grant Sees The President and Talks of the South.

Bishop Abraham Grant was in the city Sunday, Monday and Tuesday of this week. He spoke at the Metropolitan A. M. E. Church Sunday morning and evening to large congregations. He was invited to Washington by President Roosevelt, who wanted his opinion and advice on his Southern policy. The Bishop is one of the big men of the race. He has an accurate knowledge of the condition of the white and colored people of the South and is, himself, a fine illustration of the possibilities of the American Negro. In his interview with the President, he gave most hearty approval of the appointment of Ex-Gov. Jones of Alabama, as a federal judge of that state. "Such appointments as that, Mr. President," said Bishop Grant, "will guarantee justice to all and will give the colored man a greater sense of security than anything else." Gov. Jones used stronger language against lynching than any President ever used.

"My answer to lynching in some places," answered the President, "was the appointment of Gov. Jones." The President went on to say that his reading the language of Gov. Jones against lynching had as much to do with the Jones appointment as anything else.

Bishop Grant asked the President to confer with some conservative and intelligent colored leaders before definitely fixing upon a policy in Southern affairs. "Whatever is best to strengthen the friendship of the white and colored people of the South, I will favor," said Bishop Grant. "The white people and the Negro must settle down and live together in peace. Our interests in the South are much greater than in the remainder of the country, and the President can and will do much to solve the question that confronts every President."

The Medico Chic Society Meet.

The regular meeting of the Medico-Chirurgical Society of the D. C., will be held at Dr. Trancils 2111 Pa. avenue northwest, Tuesday October 24 8 p. m. Prof. Robert Reyburn will read a paper subject; Prevention of infection by Micro-organisms through Oral and Nasal cavities, all graduates of the medical department of Howard University are cordially invited to be present. A. W. Tancil, M. D., President, A. B. Cole, M. D., Cor., Secretary.

COLORED PRINTER WANTED.

A first class colored printer, who understands job work and general newspaper work could secure a permanent place by addressing "C," or calling at The Colored American office, 459 C St. northwest. A permanent position with a fair salary will be given the right kind of man.

LOCAL LORE.

Mr. Frank E. Parks is still another Pension Office clerk who had the good fortune to figure as the receiving end of a promotion to the \$1,200 dollar class. From the arduous nature of his duties and the very faithful way he has performing them, he is pre-eminently

worthy of this honor and no one who knows genial Frank Parks, the Isaac Walton of local sportsmen will envy him this success.

Mrs. Lottie E. Wilson, the celebrated pastel and oil artist of Bay City, Mich., has been persuaded by her friends to locate in this city. She has opened up her studio at 806 M street, n. w., where she will be glad to see the general public and especially those who are interested in the work of art. Later she will be prepared to take scholars in oil painting, free hand drawing and miniature work.

Prof. Booker T. Washington, accompanied by his stenographer, Mr. N. Aunt, was in the city last Wednesday. They have been making a tour of Mississippi and the Gulf states. Mr. Washington dined with President Roosevelt by special invitation Wednesday evening.

An Elocution Recital will be given by Miss Annie Smith, a graduate of the New England Conservatory, at the Presbyterian church, 15th street near K northwest, Friday evening November 1st. She will be assisted by such local talent as Miss Lula Johnson, Miss Jeanette Williamson, Prof. John T. Layton, Mr. Bernadine Smith and Miss Mary E. Smith. The admission price is 35 cents.

INDUSTRIAL NOTES

The export of bicycles is on the increase.

Pig iron production is now 225,000 tons per week.

Researches into the constitution of matter are being made.

Manufacturing establishments are forcing production day and night.

The Siberian railroad is going ahead at the rate of three miles a day.

Five steel tugs are to be built at Dubuque. Electrical houses are crowded.

More people are now earning money in the United States than for many years.

France has 16 new battleships, 10 of battleships of doubtful value and 2 modern cruisers.

In some parts of Europe they put an electric motor on a tricycle and haul small boats easily.

A fast steamer made the 4,200 mile run between Yokohama and Tacoma in 11 days and 17 hours.

There are 1,100 students in the New Armour Institute, Chicago, and there will be 2,000 in a year.

An immense ship building yard is to be erected in Scotland. This country will have two or three.

There is another seamless tube out that beats everything. They are drawn at the rate of 24 feet per minute.

For the first five months of this year, exports in the United States and Canada foot up \$19,000,000 against \$52,000,000 same time last year.

Brass is a very common article in manufacturing. It is now to be partly replaced by aluminum coated with copper or brass.

"Kaiser Friedrich" is a new German ship just arrived at New York, 600 feet long, steel, 25,000 horse power, steam pressure 225 pounds per square inch.

Three million dollars is being spent by the United States Government on the harbors of Lake Superior. The Duluth Superior harbor is to be made 21 feet deep.

If Great Britain had to go to war it could send out 34 new battleships, 52 large cruisers, 97 very rapid torpedo boat destroyers, besides a large number of other vessels, including 20 older battleships as a reserve that can do deadly work.

Gathman's aerial torpedo spoken of is the most dangerous torpedo in existence, they hold 400 pounds of gun-cotton, while those now in use hold only 50. These shells are just as destructive at eight miles as at 800 feet. They are made of brass.

Some Yankee concern will soon have a contract to make 246 miles of riveted steel pipe, 31 inches internal diameter and 82 miles welded steel pipe of 26 to 29 inches diameter for western Australia. Water is to be brought up hill and down dale all this distance. The cost is \$12,000,000.

Chimney stacks will soon be made 300 feet high. There is one in Brooklyn 240 feet high, made of steel; diameter at bottom 25 feet; 25 feet up it tapers to 15 feet, 6 inches; at the top it is 12 feet. The steel plates are 5/8 of an inch thick. It is lined throughout by fire brick, backed by red brick.

China buys nearly one-half of the entire exports of American cotton cloths, and our drills are used in making sails for the thousands of boats engaged in navigating the rivers of that country. Russian cotton goods, which have successfully competed with those of England in the markets of Persia and Central Asia, have hardly yet made their appearance in the Chinese markets.

The earth weighs 6,000,000,000,000,000,000 tons. It would take a 10,000 horse power engine 70,000,000,000 years to lift it one foot. The water necessary to make the steam to do this is equal to the amount that would flow out of the Mississippi in 60,000 years. This would be enough water to cover the entire surface of the earth to a depth of about 300 feet; to convert this water into steam, using good boilers, would require about 4,000,000,000,000,000 tons of coal; if this coal were loaded on cars 20 tons each it would require 200,000,000,000,000 cars; if the cars were three feet long and all com-

DRESSMAKING ACADEMY.
